

eSignAnyWhere Workflow (eSAW)

| | |
|-----------------------|---------|
| Related Article Codes | SAW-011 |
|-----------------------|---------|

The **eSignAnyWhere Workflow** (eSAW) documentation focuses on features offered by the graphical Web UI of eSignAnyWhere and also the integration options, including API documentation, of eSignAnyWhere.

Please consider that following items are not covered in detail:

- Internas of the underlying SIGNificant Server Platform, incl all details of the Workstep Configuration
- Documentation of the real-time biometric signature verification using the SIGNificant Biometric Server, which can be combined with, but is not part of, the eSignAnyWhere Workflow product by default
- Details about the SIGNificant Apps, Kiosk SDK, SignOnPhone etc
