Global Actions

- Add new User
- Opens the user editor to create a new user editor. See section "Add new User / Edit User Settings" below for details.
- Add from Address Book

Columns in the Table

- Email
- First Name
- Last Name
- Username
- specific for SAML user bindingSID
- specific for SAML user binding
- Roles
 - The roles assigned to a user account
- Enabled

Status of the user account. If an account is currently not enabled, the user cannot login nor use the API. The parameter can be changed only via AdmInWeb, or via eSignAnyWhere API by a user with administrative permissions on users.

1

The columns "Username" and "SID" are visible only if one of the following is fulfilled:

- The SAML configuration is configured in the instance configuration (i.e. the configuration "externalServices/shibboleth /allowSamlLoginForUser" is enabled & "externalServices/shibboleth/configService" has a value)
- System is running in OnPremise.

Activities on the table rows

 Edit user settings (^(Q)) A detailled explaination of the user editor can be found in the section "Add new User / Edit User Settings" below.

 Delete user (¹) A detailled explaination of the action can be found in the section "Delete User" below.

For more information about how to create a new role please have a look at this guide: Roles and Permissions

User Permissions

There are the following predefined roles:

- Power User
- Registered Signer
- Administrator
- Automatic Sealing Sender
- Developer
- Api User

Users with the role "Power User" can send and manage envelopes.

Users with the role"Registered Signer" can sign documents and see the signed documents and tasks.

Users with the role "Administrator" are able to change organization settings, manage users and the user can define teams.

Users with the role "Automatic Sealing Sender" can use the automatic remote signatures in a workflow.

Users with the role "Developer" can download the envelope XML/JSON of his/her envelopes.

Users with the role "Api User" are allowed to use the SOAP/REST API

After you added a new user, the user gets an email with a link and has to activate his profile and set up his password.

Note that it is **not** possible to change a user's email address. In case a user's email address changed, please download all the documents of signed envelopes (if not done before), and then create a new user with the new mail address and let the user log in to be sure the user was activated and is working as intended. After that, delete the user with the old email address. During deletion of the user, you will be asked to reassign the in-progress envelopes, drafts etc to another user. Here you can select the newly created user.

Delete User

Action which allows a user to delete another user's account on eSignAnyWhere. A user cannot delete his own account.

Before deleting a user account, the current user who performs the action will be asked to confirm the user deletion. Note that a deletion, once confirmed, cannot be undone.

The dialog will show the user's name and email address, to ensure that the intended user account is deleted.

Confirm deletion	
Do you want to remove this user? (Jane Doe -	.com)
	NO YES

When the user account who should be deleted was used for sending envelopes, and the envelopes are not yet deleted, it is mandatory to specify another user to whom the already sent envelopes in any state (including in-progress and completed ones) are re-assigned. The dialog allows (but does not require) to reassign also drafts, templates, clipboard entries and address book entries to another user.
