Settings and Customizing

The "Settings and Customization" section contains several views to manage user or organization wide settings. It depends on a user's permissions, and also on feature flags enabled for the organization, which of the following views are accessible for a user.

In the next chapters, we will cover:

- Account Settings
- Notification Settings
- Address Book
- Roles and Permissions
- Api Token and Apps
- Organization Settings
- Identity Providers
- Licensing
- Users
- Team Settings
 Localization Settings
- Notification Template Settings
- Agreements Configuration
- Envelope History
 Errors View
